

Teaching pack

You will be cured of tuberculosis (TB)

Many people feel that there is a lack of quality-assured teaching material about tuberculosis (TB).

The TB project *Confidence and knowledge in the Drammen area* has developed a teaching pack that can be used by health workers and teachers in their work.

The teaching pack explains through simple language and images how TB infects people, the signs of the illness, how TB is cured and what former patients say about having TB.

The teaching pack consists of the following six components:

- an information sheet
- a user guide
- a presentation and accompanying manuscript
- group tasks
- informational films
- frequently asked questions (faq)
